

Scully Load Anywhere® System

**Complete Overfill Prevention Loading Rack Compatibility
Featuring Dynacheck® - Automatic and Continuous Self-Checking Circuitry**

Scully truck mounted control monitor and sockets

The Scully Load Anywhere® Overfill Prevention System offers the maximum safety in tank truck loading operations. System components include the Scully Load Anywhere Control Monitor, Optic Sensors and Optic, Thermistor or Float Sockets. The Scully Load Anywhere System offers all these advantages:

- Complete compatibility with Scully Optic and Thermistor Rack Control Monitors - the #1 choice of over 90% of all bottom loading terminals in the United States.
- Dynacheck® - automatic and continuous self-checking circuitry for maximum safety through electronic monitoring.
- Over 30 years of field-proven performance making Scully the #1 choice worldwide.
- No manual checks are needed.
- Durable construction for long-lasting dependability.
- Optic sensors that defeat fogging.
- Resistance to a wide range of temperatures.
- Easy installation with step by step instructions.
- The best service in the business with toll-free trouble-shooting and maintenance assistance.
- A complete system with monitor, sensors, sockets and installation kit.

See our IntelliCheck® Brochure for the latest in Tank Truck Overfill Prevention and Retained Product Monitoring.

Setting New Standards In Safety

Scully's Load Anywhere® Overfill Prevention System Offers You The Ultimate In Safety With Unmatched Dependability

Complete Compatibility With Loading Racks

The Scully Load Anywhere System is designed to offer complete compatibility with all Scully loading rack overfill prevention controls. Whether the terminal uses optic, thermistor or even float rack controls, with the proper configuration, you can hook up and load. Scully's Load Anywhere System allows you to load anywhere!

Over 90% of all bottom loading terminals in the United States use Scully Overfill Prevention Rack Control Monitors. Now that's compatibility! It only makes sense to choose Scully for your tank truck equipment to be assured of maximum safety. Scully gives you total protection backed by over 60 years of experience in time-proven, field-tested liquid handling systems.

Dynacheck® - The Ultimate Safety Net

The Scully Load Anywhere System incorporates Dynacheck automatic and continuous self-testing circuitry. Dynacheck sends a pulsing signal throughout the entire system. All components including the controller sensors, wiring and connections are checked. If everything is working properly, the signal reports back to the controller that the system is in a "safe" condition. The entire system checks itself automatically an average of up to 30 times per second! If a sensor is wetted by product or there is an unlikely fault in the system circuitry, the signal reports back to the controller that the system is in an "unsafe" condition. The controller generates a shutdown signal and all pumps and valves are shut off, preventing a potentially hazardous spill.

No operator is needed! Only Scully offers you the confidence of Dynacheck. **Don't settle for less!**

The System With A Brain

The Scully Load Anywhere Control Monitor is the "brain" of the Load Anywhere System. The control monitor translates permissive signals from the optic sensors to thermistor, optic and float compatible rack control signals. It also serves to pinpoint problems through the use of power and compartment indicators. There are three types of indicator lights on the unit. There is a power indicator, a permit indicator and individual compartment indicators. The new state of the art design has indicators which read right to left and is designed to prevent moisture build up.
